

Erijon Huruglica

AI & Software Engineering Student | Python, Cloud & Applied AI

huruglica.2005@gmail.com | +383 49 770 242 | linkedin.com/in/erijon-huruglica-179147329 | github.com/erijonh

SUMMARY

Computing and Information Technologies student at RIT Kosovo with practical experience in Python, FastAPI, cloud, DevOps, and applied AI. Built AI applications, deployed web projects, and supported day-to-day business IT systems and hardware. Seeking an entry-level AI or software engineering role.

EXPERIENCE

Gjilan Alteco

E-commerce Website Project

Jan 2024 – Present

Gjilan, Kosovo

- Built and launched the company e-commerce website at alteco-ks.xyz, improving its online presence and giving customers a direct way to view its offering.
- Designed and developed the site with modern web technologies, translating business needs into a working customer-facing product.

Gjilan Alteco

IT Intern

Jan 2020 – Jan 2022

Gjilan, Kosovo

- Supported printers, laptops, desktop computers, and related IT infrastructure to keep daily operations running reliably.
- Contributed to website design and social media content while coordinating technical work with business priorities.
- Strengthened troubleshooting, hardware support, web design, and cross-team communication skills.

Upshift Team Project

Community Improvement Competition

Jun 2021 – Jan 2022

Kosovo

- Led team communication and collaboration during a community improvement competition.
- Helped the team win the competition by coordinating work, supporting teammates, and keeping the project focused on delivery.

PROJECTS

AI News Scraper

Python · FastAPI · APScheduler · RSS · Ollama

- Built an automated news collection API with scheduled RSS processing, article endpoints, and local LLM-based content processing through Ollama.

Local LLM Chatbot

Python · Ollama · Phi-3

- Developed a privacy-focused chatbot that runs language-model inference locally without sending conversations to external cloud services.

WeatherWeb

Python · Web APIs · Deployment

- Built and deployed a weather web application that retrieves external API data and presents current conditions through a user-facing interface.

SKILLS

■ Python	■ FastAPI	■ AWS
■ JavaScript	■ Uvicorn	■ Docker
■ HTML / CSS	■ LLMs / Ollama	■ Kubernetes
■ WordPress	■ MCP / Agentic AI	■ Terraform
■ Linux / SSH	■ AI Fundamentals	■ Cybersecurity / DevOps

EDUCATION & CERTIFICATIONS

Rochester Institute of Technology — BSc in Computing and Information Technologies	Expected May 2027
Udacity — AWS AI Practitioner	Mar 2026
RIT TDI — Python Advanced	Feb 2026 – May 2026
BeSA Academy — Agentic AI on AWS	Jul 2026
DeepLearning.AI · Stanford University — Supervised Machine Learning: Regression and Classification	Jun 2026
Packt — Azure AI Engineer Associate AI-102 Course	May 2026 – Jun 2026
RiCloud — DevOps & Cloud	Jul 2026 – Present
